SUMMARY

With advanced proficiency in JavaScript and React, I love building dynamic, scalable, and user-friendly frontends. Skilled in the MERN stack (MongoDB, Express, React, Node.js), I enjoy designing robust backend systems and integrating them seamlessly with modern frontends. Exploring the exciting world of Generative AI and Large Language Models (LLMs).

PROJECTS

Edu Learn | React.js, Redux Toolkit, MERN

July 2025 - July 2025

- Developed Edu Learn, a full-stack educational platform using React.js, Redux Toolkit, Node.js, Express.js, and MongoDB.
- Built role-based dashboards: Educators can manage lectures and track earnings; Students can browse and enroll in courses.
- Implemented secure authentication with cookies and RESTful APIs for user, course, and enrollment management.
- Integrated Cloudinary for video/image storage and designed a responsive, user-friendly interface.

ChillZone | React.js, MERN, Socket.io

Sep 2025 - Sep 2025

- Built a real-time chat platform where users can create and join chat groups.
- Implemented admin controls to manage groups (edit/delete) and moderate users.
- Designed and deployed RESTful Node.js + Express APIs for user, group, and chat management.
- Integrated Socket.io for real-time bi-directional messaging.
- Utilized MongoDB for storing user data, chat histories, and group details.
- Developed a responsive and user-friendly interface with React.js.

Portfolio | React.js, GSAP

Oct 2025 - Oct 2025

- Developed a personal portfolio website with React.js and GSAP animations for smooth, interactive UI.
 - Showcases multiple projects with dynamic sections for experience, skills, and achievements.
 - Designed a responsive interface for optimal viewing across devices.
